Jointly run by local farmers, our group sorts, ships, processes and sells local vegetables, plums, and persimmons. As herbal drugs have long been produced in the Gojo area, we also grow Yamato Toki (Japanese angelica) and work to develop it into new products.

Frog with three legs

<Company' s comment>

Daranisuke, with its 1,300 year history, is said to be the origin of Wakan medicine. Fujii Risaburo Yakubo is the original maker of this medicine, known as “Fujii Daranisuke-gan” . The story goes that 300 years ago, a large 3-legged frog - a messenger from the master of medicine - revealed the secret method of making the medicine to mankind. Remaining faithful to this original formula, we have continued the production of the drug here on Mt. Yoshino, a UNESCO World Heritage site.

Our trademark is the frog with 3 legs. All our products are made without additives.
